Mobile Computing

Assignment 1: NUCES Information App

Create a NUCES Information app. The app should display the campuses, admission, and department information. You can take the data from NUCES website. A screen layout is attached for your reference. You are free to change the layout and include any further contents given that you need to make use of following in your app

- Header
    - Include NUCES Logo
- Content
    - List View
    - Calling a native app from this app, in our case it would be google map.
    - Collapsible Panel
- Footer
    - Copyrights

Submission (By Feb 26, 2015)
- Zip folder, named with your roll number.
    - Index file with resources if any.
    - Apk file.

Why you should care
- Simple but useful
- You can extend this to include more features and bring to the standard of an app known as "**iStanford**"
- You can easily sell it to schools, with additional features and customization.
